Subject: Thank You!

Henry, Michael, and the rest of the AIPG Executive Committee

I was surprised and pleased to receive the plaque recognizing me for my contributions to AIPG-TX. The 6 years I spent on the Executive Committee were personally rewarding for me. My association with such an accomplished group of geologists can only have made me a better professional. It is satisfying to know that I may have played a small part in the continued success of AIPG-TX.

As for my career, I have moved from the Hydrex complex into an office near downtown Nacogdoches. It was time to get out of the way and allow younger folks their chance. While I continue to provide support to Hydrex, I am also welcoming new challenges and involvement in other areas. I recently designed and implemented an extensive phyto-remediation system to extract shallow groundwater impacted by fertilizer compounds. The path from prospecting near Tonopah, Nevada in the 1970s to here has been tortuous indeed!

Thank you all. I wish you the best. If you are ever in Nacogdoches, or passing through, please give me a call or drop in.

Glen
