

AAPG®

Advancing the World of Petroleum Geosciences

Meeting Registration Approved

Topic 7 - Pivoting 2021: Energy Industry Supply Chains

Description Supply chains continue to be an area of rapid job growth. Making sure that products are environmentally and ethically sound applies to the energy industry now more than ever. As workflows are automated and new kinds of energy technologies are implemented, supply chain issues come to the forefront. Panelists will discuss some of the most prominent advances in supply chain practice, including provenance of hydrocarbons and critical minerals, authenticity assurance, blockchain, automation, multiple sourcing, and 3D printing

AGENDA

7:00 - 7:15 Introductions

Rick Fritz, AAPG President

Meredith Faber, DPA President

Miriam Winsten, DEG President-Elect

Julian Chenin, Sustainability Committee

7:15 - 7:55 Presentations (5-8 minutes) and discussions
